**In welcher Welt leben?** Eduardo Viveiros de Castro 2019-04-26 Die Vorstellungen vom Ende der Welt sind so vielfältig und zahlreich wie ihre Kulturen. Von der Sintflut über nukleare Katastrophen bis zur Vernichtung der Menschheit durch ein Supervirus reichen die Fantasien, die nicht nur die Science-Fiction durchziehen, sondern auch ganze Philosophien und Religionen begründen. Die Philosophin Deborah Danowski und der Ethnologe Eduardo Viveiros de Castro beleuchten in diesem Buch die wichtigsten und verbreitetsten Variationen des Themas vom Ende der Welt vor dem Hintergrund der globalen Umweltkrisen im Anthropozän. Die gegenwärtigen Katastrophenszenarien sind zumeist auch Gedankenexperimente über den drohenden Niedergang der westlichen Zivilisation. Es wird klar: Das Ende der Welt muss nicht gleich das Ende aller Zeiten bedeuten. In diesem in viele Sprachen übersetzten Essay ziehen die beiden Autoren eine Bilanz aus den Enden der Welt, um aus ihnen weitreichende philosophische, ökologische und anthropologische Schlussfolgerungen für die politische Praxis zu schöpfen. Ein wichtiges Buch für unsere Zeit, ein Buch, das Hoffnung macht.

Sein neues Buch schaut auf das Hier und Jetzt und konfrontiert uns mit den drängenden Fragen unserer Zeit. Wie unterscheiden wir Wahrheit und Fiktion im Zeitalter der Fake News? Was sollen wir unseren Kindern beibringen? Wie können wir in unserer unübersichtlichen Welt moralisch handeln? Wie bewahren wir Freiheit und Gleichheit im 21. Jahrhundert? Seit Jahrtausenden hat die Menschheit über den Fragen gebrütet, wer wir sind und was wir mit unserem Leben anfangen sollen. Doch jetzt setzen uns die heraufziehende ökologische Krise, die wachsende Bedrohung durch Massenvernichtungswaffen und der Aufstieg neuer disruptiver Technologien unter Zeitdruck. Bald schon wird irgendjemand darüber entscheiden müssen, wie wir die Macht nutzen, die künstliche Intelligenz und Biotechnologie bereit halten. Dieses Buch will möglichst viele Menschen dazu anregen, sich an den großen Debatten unserer Zeit zu beteiligen, damit die Antworten nicht von den blinden Kräften des Marktes gegeben werden.

**10. Münsteraner Workshop zur Schulformatik** Marco Thomas 2022-06-21 Der 10te Münsteraner Workshop diskutiert, wie im Informatikunterricht der Einbezug von Schüler\*innen mit unterschiedlichen Lernvoraussetzungen gelingen kann. In der Oberstufe ist der Umgang mit Heterogenität alltäglich, da Informatikunterricht zu unterschiedlichen Zeitpunkten an einer Schule starten kann. Zu weiteren Diversitätsaspekten, die Informatikunterricht beeinflussen können, gehören: Interessen, Gender, Begabung, Kultur und Sprache und soziale Herkunft. Der hohe Stellenwert digitaler Werkzeuge im Informatikunterricht kann Inklusion erschweren, aber auch eine Chance für eine gleichberechtigte Teilnahme darstellen.

**Cognitive Sociolinguistics Revisited** Gitte Kristiansen 2021-11-22 Cognitive Sociolinguistics draws on the rich theoretical framework of Cognitive Linguistics and focuses on the social factors that underlie the variability of meaning and conceptualization. In the last decade, the field has expanded in various way. The current volume takes stock of current and emerging advances in the field in short academic contributions. The studies collected in this book have a usage-based approach to language variation and change, drawing on the theoretical framework of Cognitive Linguistics and are sensitive to social variation, be it cross-linguistic or language-internal. Three types of contributions are collected in this book. First, it

contains theoretical overview papers on the domains that have witnessed expansion in recent years. Second, it presents novel research ideas in proof-of-concept contributions, aimed at blue-sky research and out-of-the-box linguistic analyses. Third, it showcases recent empirical studies within the field. By combining these three types of contributions, the book provides an encompassing overview of novel developments in the field of Cognitive Sociolinguistics.

**Language Teaching with Video-Based Technologies** Michael Thomas 2020-07-03 This book explores the implications of technology-mediated project-based language learning for CALL teacher development, focusing on the role of video-based instruction in elucidating challenges and opportunities to promote learner creativity in the language classroom. The volume builds on existing literature on project-based language learning by extending the focus on the affordances of machinima, digital video created by teachers and learners to capture experience in 3D immersive games or virtual worlds. Drawing on data from a large-scale research project featuring case studies that examine different facets of CALL teacher education, the book calls attention to language learning and teaching strategies that encourage both learners and teachers to develop innovative approaches in the language classroom and how such approaches promote the integration of lifelong learning skills alongside traditional linguistic competencies. Offering a dynamic contribution to the growing literature on the interface of language learning and teaching and technology, this book will appeal to students and researchers in applied linguistics and language and education, as well as those interested in the latest developments in CALL.

**Atheism for Beginners** Michael Palmer 2013-02-28 'Hurray for Michael Palmer!' is how Michael Martin, the distinguished American philosopher, greeted Palmer's *The Atheist's Primer* (Lutterworth, 2012). *Atheism for Beginners*, by providing a 'coursebook for schools and colleges,' differs from its predecessor in being designed specifically for teachers and their students. Yet, although different in focus and format, the intention remains the same: to reinstate the importance of philosophy within the debate about God's existence and to act as a corrective to the largely Darwinian criticisms levelled against religious belief by Richard Dawkins and the so-called 'new atheists'. So, in Palmer's lively history of atheism, extending from the ancient Greeks to the present day, we meet the enduring philosophical arguments against God and the great literature in which they are expressed. *Atheism for Beginners* is user-friendly and presumes no special grounding in philosophy. Throughout assistance is given by numerous aids to learning: there are exercises, marginal notes, essay questions, bibliographies and a glossary. Also provided are fourteen short biographies of famous atheists. In these respects Palmer follows the format first presented in his widely-read *Moral Problems* of 1991, long established as a core text in the teaching of philosophy. In *Atheism for Beginners*, Palmer covers the main atheistic arguments, discussing issues such as creation, morality, evil, miracles and the motivations of belief. Particular attention is paid to the work of Hume, Marx, Nietzsche and Freud, with a special chapter devoted to the development of 'disproof atheism'. Atheism is often criticized for being unduly pessimistic: that without God there is nothing to look forward to, no life after death, no final fighting of wrongs and no hope of salvation. But this, Palmer argues, is 'a slander against the atheistic outlook'. He concludes, therefore, on a positive note, explaining that happiness and personal fulfilment are to be found in the very materialism that religious belief rejects.

**Usage-Based Approaches to Language Acquisition and Language Teaching** Jacqueline Evers-Vermeul 2017-03-06 Although usage-based approaches have been successfully applied to the study of both first and second language acquisition, to monolingual and bilingual development, and to naturalistic and instructed settings, it is not common to consider these different kinds of acquisition in tandem. The present volume takes an integrative approach and shows that usage-based theories provide a much needed unified framework for the study of first, second and foreign language acquisition, in monolingual and bilingual contexts. The contributions target the acquisition of a wide range of linguistic phenomena and critically assess the applicability and explanatory power of the usage-based paradigm. The book also systematically examines a range of cognitive and linguistic factors involved in the process of language development and relates relevant findings to language teaching. Finally, this volume contributes to the assessment and refinement of empirical methods currently employed in usage-based acquisition research. This book is of interest to scholars of language acquisition, language pedagogy, developmental psychology, as well as Cognitive Linguistics and Construction Grammar.

**Mediating Netherlandish art and material culture in Asia** Michael North 2015-01-10 While the socio-economic and historical aspects of the Dutch East India Company (VOC) have been extensively documented and researched, the role of the VOC in visual culture and the arts has been relatively neglected. This authoritative volume addresses various aspects of cultural exchange between the Low Countries and Asia. Increased prosperity and the flood of imported goods from Asia had a huge influence on seventeenth-century Holland. To cite some examples: when the VOC spread its merchandise throughout the various regions of Asia, Chinese decorative motives became popular in Indonesia. After the lifting of the seventeenth-century ban on the import of Christian books to Japan, a wave of interest in Dutch culture hit the country, giving rise to Hollandmania, imitation of anything Dutch. 'Mediating Netherlandish Art and Material Culture in Asia' offers new insights into the world routes travelled by seventeenth-century Dutch visual culture, as well as the rise of Asian influence in the imagery of the Dutch Golden Age.

**Teaching and Learning Foreign Languages** Nicola McLelland 2017-07-14 *Teaching and Learning Foreign Languages* provides a comprehensive history of language teaching and learning in the UK from its earliest beginnings to the year 2000. McLelland offers the first history of the social context of foreign language education in Britain, as well as an overview of changing approaches, methods and techniques in language teaching and learning. The important impact of classroom-external factors on developments in language teaching and learning is also taken into account, particularly regarding the policies and public examination requirements of the 20th century. Beginning with a chronological overview of language teaching and learning in Britain, McLelland explores which languages were learned when, why and by whom, before examining the social history of language teaching and learning in greater detail, addressing topics including the status that language learning and teaching have held in society. McLelland also provides a history of how languages have been taught, contrasting historical developments with current orthodoxies of language teaching. Experiences outside school are discussed with reference to examples from adult education, teach-yourself courses and military language learning. Providing an accessible, authoritative history of language education in Britain, *Teaching and Learning Foreign Languages* will appeal to academics and postgraduate students engaged in the history of education and language learning across the world. The book will also be of interest to teacher educators, trainee and practising teachers, policymakers and curriculum developers.

**The Form of Information in Science Z. Harris** 2012-12-06 DOES DISCOURSE HAVE A 'STRUCTURE'? HARRIS'S REVOLUTION IN LINGUISTICS As a freshman back in 1947 I discovered that within the various academic divisions and subdivisions of the University of Pennsylvania there existed a something (it was not a Department, but a piece of the Anthropology Department) called 'Linguistic Analysis'. I was an untalented but enthusiastic student of Greek and a slightly more talented student of German, as well as the son of a translator, so the idea of 'Linguistic Analysis' attracted me, sight unseen, and I signed up for a course. It turned out that 'Linguistic Analysis' was essentially a graduate program - I and another undergraduate called Noam Chomsky were the only two undergraduates who took courses in Linguistic Analysis - and also that it was essentially a one-man show: a professor named Zellig Harris taught all the courses with the aid of graduate Teaching Fellows (and possibly - I am not sure - one Assistant Professor). The technicalities of Linguistic Analysis were formidable, and I never did master them all. But the powerful intellect and personality of Zellig Harris drew me like a lodestone, and, although I majored in Philosophy, I took every course there was to take in Linguistic Analysis from then until my graduation. What 'Linguistics' was like before Zellig Harris is something not many people care to remember today.
